
Abstract

Blah blah blah

Lemma 0.0.1.

Definition 0.0.1. The completion of a metric space (X, d) consists of:

- (1) A complete metric space (Z, ρ) ;
- (2) An isometry $\iota : X \hookrightarrow Z$;
- (3) The image of X is dense in Z ; i.e., $\overline{\iota(X)}^\rho = Z$.
